November 18, 2012

Dear Dr. Shulkin;

I felt it necessary to share my personal experience on October 25, 2012, when I had surgery at Morristown Medical Center.

From the second that I walked in the door in the morning, through my discharge late afternoon, Every single person that I came in contact with was outstanding and professional. From registration to 2nd stage recovery, every person made a significant impression on me.

As a twenty year employee at Morristown Medical Center, I looked at my experience through a patient's eye as well as an employee. I did not recognize all the people I saw and yet when I did see a few faces (especially in pre-op where my work frequently takes me) that I knew, I was treated with respect, concern and professionalism.

You should feel honored to have Dr. Brian Glatt, my surgeon, on your staff. I come in contact with many doctors during my duties at the hospital. But being on the other side, as a patient, I have all the concerns, fears and anxiety that any other patient has. Dr. Glatt is unique in that from day one to the day of surgery, he is there to answer questions and ease the concerns. He is also an amazing surgeon.

Thank you for a well-run organization. I have always felt very proud of where I work and am just as proud to have had my surgery at my home away from home.

Sincerely,
